

# Parents

Please read these three simple messages so your young children are safe and healthy when using computers and mobile phones.

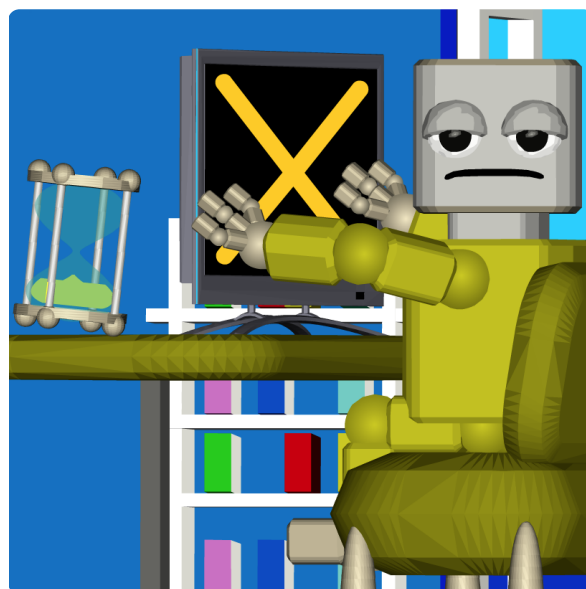

Encourage your children to tell you when anything appears on their computer or mobile phone screen they don't understand. Never let them know your username and passwords.

Make sure when your children are using a computer or mobile phone you can see what they are doing at all times.

Don't let young children spend too long using a computer or mobile phone. If you are leaving your child, let their new carer know if they have already used any mobile devices.

Play the E-Safety mini adventure at Early Years World and learn about these three simple messages.
