

Childhood

We can learn a lot about the past by finding out what it was like to be a child years ago and comparing that with what it is like today.

Stages of human life

There are six stages of human life.

baby

toddler

child

teenager

adult

elderly

At each stage, people have different needs, responsibilities and lifestyles.

Five senses

Humans have five senses. They are sight, hearing, smell, taste and touch. We have body parts to allow us to sense our surroundings.

Eyes are used for sight. Our eyes see the things in our surroundings that are close to us and far away.

Ears are used for hearing. Our ears collect sounds around us so that we can hear. Humans can hear sounds that are quiet, loud, high and low.

The nose is used to smell. Smells enter our noses through our nostrils as we breathe.

The tongue is used to taste. Our tongues can taste different flavours.

The skin gives us our sense of touch. We can feel if something is soft or hard, smooth or rough, hot or cold.

Portraits

A portrait is a painting, photograph or drawing of a person. The person in the portrait is called the subject.

Self-portraits

A self-portrait is a portrait that an artist produces of themselves. Vincent van Gogh painted many self-portraits.

Comparing portraits

Portraits can be compared. The subject, colour, form, texture or composition of portraits can be similar or different.

The textures of these two portraits are similar but the colours are different.

Body parts

There are many different parts of the human body. Each body part has a function. For example, our head allows us to sense what is happening around us. Our neck supports and turns the head.

Our Wonderful World

What is geography?

Geography is the study of the world and its people and places.

Human features

Human features are made by people to help them live in a place or move around from one place to another. They include cities, towns, villages, factories, farms, roads, bridges, houses, offices, ports, harbours and shops.
